#97921

# Camera Kit Assembled

Scan the QR code to see a video on how to assemble the kit.

The quick release phone clip threads onto the mounting clamp either vertically or horizontally.

Phone attachment set assembled. Phone not included.

All pieces will screw or thread together. Be sure to tighten each section sufficiently so that it doesn't move while you're working. If you need to change the angle of the camera or light, simply loosen the screw(s) to adjust the angle and retighten. The camera threads onto the top piece but may be facing the wrong direction. Loosen the camera to face the direction you desire and then turn the dial on the connector piece to tighten.

Camera and light set assembled.
